Laboratory Manual for Comparative Veterinary Anatomy & Physiology M.S. D.V.M. Phillip E. Cochran
For veterinary technology and pre-veterinary medicine students, this is the only comparative veterinary anatomy and physiology manual covering cat dissection, sheep heart, brain and eye, and the pig's kidney. An introduction to laboratory equipment and techniques prepares the students for lab work. The book covers the muscular, digestive, respiratory, cardiovascular, urinary, reproductive, endocrine and nervous systems. It also covers skeletal anatomy of many species. Each chapter includes a physiology experiment to help illustrate some of the principles of physiology covered in lecture portions of the course instruction. Histology of tissues is also covered in this manual. A basic knowledge of biology is assumed.
