Computational Methods in Nonlinear Structural and Solid Mechanics

Ahmed K. Noor, H.G. McComb

Computational Methods in Nonlinear Structural and Solid Mechanics Ahmed K. Noor, H.G. McComb Computational Methods in Nonlinear Structural and Solid Mechanics covers the proceedings of the Symposium on Computational Methods in Nonlinear Structural and Solid Mechanics. The book covers the development of efficient discretization approaches; advanced numerical methods; improved programming techniques; and applications of these developments to nonlinear analysis of structures and solids. The chapters of the text are organized into 10 parts according to the issue they tackle. The first part deals with nonlinear mathematical theories and formulation aspects, while the second part covers computational strategies for nonlinear programs. Part 3 deals with time integration and numerical solution of nonlinear algebraic equations, while Part 4 discusses material characterization and nonlinear fracture mechanics, and Part 5 tackles nonlinear interaction problems. The sixth part discusses seismic response and nonlinear analysis of concrete structure, and the seventh part tackles nonlinear problems for nuclear reactors. Part 8 covers crash dynamics and impact problems, while Part 9 deals with nonlinear problems of fibrous composites and advanced nonlinear applications. The last part discusses computerized symbolic manipulation and nonlinear analysis software systems. The book will be of great interest to numerical analysts, computer scientists, structural engineers, and other professionals concerned with nonlinear structural and solid mechanics.

From reader reviews:

Samantha Campbell:

Have you spare time for just a day? What do you do when you have more or little spare time? Sure, you can choose the suitable activity for spend your time. Any person spent their own spare time to take a go walking, shopping, or went to the particular Mall. How about open or read a book called Computational Methods in Nonlinear Structural and Solid Mechanics? Maybe it is to become best activity for you. You understand beside you can spend your time along with your favorite's book, you can smarter than before. Do you agree with their opinion or you have various other opinion?

Cameron Trammell:

A lot of people always spent all their free time to vacation or maybe go to the outside with them loved ones or their friend. Are you aware? Many a lot of people spent they free time just watching TV, or even playing video games all day long. If you would like try to find a new activity here is look different you can read any book. It is really fun to suit your needs. If you enjoy the book that you read you can spent the entire day to reading a book. The book Computational Methods in Nonlinear Structural and Solid Mechanics it doesn't matter what good to read. There are a lot of those who recommended this book. We were holding enjoying reading this book. In case you did not have enough space to create this book you can buy typically the e-book. You can m0ore simply to read this book from the smart phone. The price is not to fund but this book offers high quality.

Sonia Shipley:

Playing with family inside a park, coming to see the coastal world or hanging out with friends is thing that usually you may have done when you have spare time, and then why you don't try matter that really opposite from that. One activity that make you not sense tired but still relaxing, trilling like on roller coaster you already been ride on and with addition of knowledge. Even you love Computational Methods in Nonlinear Structural and Solid Mechanics, it is possible to enjoy both. It is fine combination right, you still want to miss it? What kind of hang-out type is it? Oh can happen its mind hangout folks. What? Still don't understand it, oh come on its referred to as reading friends.

Michelle Mills:

What is your hobby? Have you heard which question when you got students? We believe that that issue was given by teacher on their students. Many kinds of hobby, Everyone has different hobby. And you know that little person such as reading or as reading become their hobby. You need to know that reading is very important and also book as to be the thing. Book is important thing to provide you knowledge, except your teacher or lecturer. You see good news or update concerning something by book. Many kinds of books that can you go onto be your object. One of them is this Computational Methods in Nonlinear Structural and Solid Mechanics.
