The Biostatistics of Aging: From Gompertzian Mortality to an Index of Aging-Relatedness Gilberto Levy, Bruce Levin

A practical and clarifying approach to aging and aging-related diseases

Providing a thorough and extensive theoretical framework, *The Biostatistics of Aging: From Gompertzian Mortality to an Index of Aging-Relatedness* addresses the surprisingly subtlenotion—with consequential biomedical and public health relevance—of what it means for acondition to be related to aging. In this pursuit, the book presents a new quantitative methodto examine the relative contributions of genetic and environmental factors to mortality anddisease incidence in a population.

With input from evolutionary biology, population genetics, demography, and epidemiology, this medically motivated book describes an index of aging-relatedness and also features:

- Original results on the asymptotic behavior of the minimum of time-to-event random variables, which extends those of the classical statistical theory of extreme values
- A comprehensive and satisfactory explanation based on biological principles of the Gompertz pattern of mortality in human populations
- The development of an evolution-based model of causation relevant to mortality and aging-related diseases of complex etiology
- An explanation of how and why the description of human mortality by the Gompertz distribution can be improved upon from first principles
- The amply illustrated analysis of real-world data, including a program for conducting the analysis written in the freely available R statistical software
- Technical appendices including mathematical material as well as an extensive and multidisciplinary bibliography on aging and aging-related diseases

The Biostatistics of Aging: From Gompertzian Mortality to an Index of Aging-Relatedness is an excellent resource for practitioners and researchers with an interest in aging and aging-related diseases from the fields of medicine, biology, gerontology, biostatistics, epidemiology, demography, and public health.

From reader reviews:

Jackie Lafond:

Book is to be different for every single grade. Book for children right up until adult are different content. As you may know that book is very important for all of us. The book The Biostatistics of Aging: From Gompertzian Mortality to an Index of Aging-Relatedness has been making you to know about other know-how and of course you can take more information. It is rather advantages for you. The book The Biostatistics of Aging: From Gompertzian Mortality to an Index of Aging-Relatedness is not only giving you considerably more new information but also to become your friend when you sense bored. You can spend your personal spend time to read your guide. Try to make relationship using the book The Biostatistics of Aging: From Gompertzian Mortality to an Index of Aging-Relatedness. You never experience lose out for everything in the event you read some books.

Julie Ross:

This book untitled The Biostatistics of Aging: From Gompertzian Mortality to an Index of Aging-Relatedness to be one of several books that will best seller in this year, here is because when you read this guide you can get a lot of benefit in it. You will easily to buy this kind of book in the book store or you can order it by way of online. The publisher of the book sells the e-book too. It makes you quickly to read this book, as you can read this book in your Mobile phone. So there is no reason to you personally to past this reserve from your list.

Jeffrey Blough:

In this age globalization it is important to someone to acquire information. The information will make anyone to understand the condition of the world. The condition of the world makes the information simpler to share. You can find a lot of referrals to get information example: internet, paper, book, and soon. You can view that now, a lot of publisher that print many kinds of book. Typically the book that recommended for your requirements is The Biostatistics of Aging: From Gompertzian Mortality to an Index of Aging-Relatedness this e-book consist a lot of the information with the condition of this world now. This particular book was represented how does the world has grown up. The dialect styles that writer use for explain it is easy to understand. The particular writer made some analysis when he makes this book. This is why this book ideal all of you.

Concepcion Bass:

Beside this specific The Biostatistics of Aging: From Gompertzian Mortality to an Index of Aging-Relatedness in your phone, it can give you a way to get more close to the new knowledge or facts. The information and the knowledge you will got here is fresh in the oven so don't always be worry if you feel like an outdated people live in narrow town. It is good thing to have The Biostatistics of Aging: From Gompertzian Mortality to an Index of Aging-Relatedness because this book offers for you readable

information. Do you often have book but you seldom get what it's all about. Oh come on, that would not happen if you have this within your hand. The Enjoyable set up here cannot be questionable, like treasuring beautiful island. Use you still want to miss the idea? Find this book as well as read it from now!
