Supersymmetric Mechanics - Vol. 2: The Attractor Mechanism and Space Time Singularities (Lecture Notes in Physics) Stefano Bellucci, Sergio Ferrara, Alessio Marrani

This is the first volume in a series of books on the general theme of Supersymmetric Mechanics; the series is based on lectures and discussions held in 2005 and 2006 at the INFN-Laboratori Nazionali di Frascati. This volume supplies a pedagogical introduction, at the non-expert level, to the attractor mechanism in space-time singularities. After a qualitative overview, explicit examples realizing the attractor mechanism are treated at length.
