Farming with Horses (Country Workshop) Steve Bowers, Marlen Steward

In the early twentieth century, the proliferation of farm tractors dramatically eased the burden on America's farmers. It seemed the day of the horse-drawn plough was well over. And yet today, with a new generation working smaller spreads for reasons of necessity, economics, or personal conviction, draft horses are going back to work in a big way, and proving their worth once more. This book, by a widely respected trainer of working horses, aims to show those new to farming with horses—or those simply in need of a brush-up—everything they need to make the old ways work like new.

With a wealth of color illustrations and clear, to-the-point prose, Farming with Horses reviews the different types of harness and collar, explains how to select a work horse and how to hitch a horse to an implement, and fully describes lateral and longitudinal alignment, rein grips, and every other aspect of farming with horses.
