Sverre Bagge

From Viking Stronghold to Christian Kingdom: State Formation in Norway, c. 900-1350 Sverre Bagge In this seminal work, Sverre Bagge provides a detailed account of Norwegian state formation in the period from c. 900 to 1350, widening his perspective to include a discussion of the emergence of the medieval state and state formation in the Middle Ages in general.The primary objective is to examine Norway as a case that may serve to illuminate some general problems of European state formation in the period, problems related both to the formation of the European system of independent kingdoms within a common cultural framework and to the inner development of these kingdoms. The volume furthermore examines the changes that took place in the military, social-economical, ideological, legal and administrative fields between the first formation of the kingdom and the early fourteenth century which, according to common opinion, represents a peak in the development of a Norwegian state. The volume constitutes a vivid and compelling feat, offering a fresh and innovative approach to an important chapter in the history of Norway, while also casting new light on developments in the larger context of European history.
