I Need to Scream! Would Anyone Even Hear Me? (a personal caregiver's survival guide) Lorraine Valyo Davis
The prospect of having to care for an ill loved one takes most of us by surprise. Once a diagnosis or treatment schedule has been determined, a caregiver must learn how to multi-task in very creative ways. Usually this is learned by trial and error. Until now. I Need to Scream! Would Anyone Even Hear Me? is a handbook for the caregiver. Once a loved one needs a health advocate, a caregiver is born and then quickly baptized by fire. This book will help douse that inferno. It includes chapters on how to select a hospital and doctor, along with sections on medications, family matters and most importantly, how to take care of his or her self in the process. This is not a scientific project. It is a personal account written by a caregiver. It contains suggestions on how to make the transition from normal life to a new life as painless as possible. I Need to Scream! Would Anyone Even Hear Me? attempts to remove the guilt and negativity that can become part of a caregiver's life. It also includes blank pages at the end of each chapter so that the caregiver is able to jot down notes, questions or reflections. This is a book that is long overdue. Caregivers are part of a strong and silent group. They need a voice. Few people realize the traumatic role of the caregiver, unless one has had experience like the author of this book. We do not know when a serious illness or accident will befall a loved one. It is for that reason that this book should be in every library, home and hospital. I Need to Scream! Would Anyone Even Hear Me? is unlike most publications that include this subject. This book is primarily for caregivers and the people who love them.
