Mathematical Foundations of Quantum Information and Computation and Its Applications to Nano- and Bio-systems (Theoretical and Mathematical Physics)

Masanori Ohya, I. Volovich

Mathematical Foundations of Quantum Information and Computation and Its Applications to Nano- and Bio-systems (Theoretical and Mathematical Physics) Masanori Ohya, I. Volovich

This monograph provides a mathematical foundation to the theory of quantum information and computation, with applications to various open systems including nano and bio systems.

It includes introductory material on algorithm, functional analysis, probability theory, information theory, quantum mechanics and quantum field theory. Apart from standard material on quantum information like quantum algorithm and teleportation, the authors discuss findings on the theory of entropy in C*-dynamical systems, space-time dependence of quantum entangled states, entangling operators, adaptive dynamics, relativistic quantum information, and a new paradigm for quantum computation beyond the usual quantum Turing machine. Also, some important applications of information theory to genetics and life sciences, as well as recent experimental and theoretical discoveries in quantum photosynthesis are described.

From reader reviews:

Arthur Pascual:

Do you one among people who can't read pleasurable if the sentence chained inside the straightway, hold on guys this kind of aren't like that. This Mathematical Foundations of Quantum Information and Computation and Its Applications to Nano- and Bio-systems (Theoretical and Mathematical Physics) book is readable simply by you who hate the straight word style. You will find the information here are arrange for enjoyable reading through experience without leaving perhaps decrease the knowledge that want to offer to you. The writer involving Mathematical Foundations of Quantum Information and Computation and Its Applications to Nano- and Bio-systems (Theoretical and Mathematical Physics) content conveys prospect easily to understand by most people. The printed and e-book are not different in the content but it just different by means of it. So , do you even now thinking Mathematical Foundations of Quantum Information and Computation and Its Applications to Nano- and Bio-systems (Theoretical and Mathematical Physics) is not loveable to be your top list reading book?

Rocio Linville:

This book untitled Mathematical Foundations of Quantum Information and Computation and Its Applications to Nano- and Bio-systems (Theoretical and Mathematical Physics) to be one of several books which best seller in this year, this is because when you read this reserve you can get a lot of benefit on it. You will easily to buy this kind of book in the book retail store or you can order it via online. The publisher on this book sells the e-book too. It makes you quickly to read this book, since you can read this book in your Touch screen phone. So there is no reason for your requirements to past this e-book from your list.

Marla Fiske:

This Mathematical Foundations of Quantum Information and Computation and Its Applications to Nano- and Bio-systems (Theoretical and Mathematical Physics) is great book for you because the content and that is full of information for you who also always deal with world and possess to make decision every minute. This book reveal it info accurately using great coordinate word or we can claim no rambling sentences within it. So if you are read this hurriedly you can have whole data in it. Doesn't mean it only will give you straight forward sentences but difficult core information with attractive delivering sentences. Having Mathematical Foundations of Quantum Information and Computation and Its Applications to Nano- and Bio-systems (Theoretical and Mathematical Physics) in your hand like keeping the world in your arm, facts in it is not ridiculous just one. We can say that no e-book that offer you world within ten or fifteen moment right but this book already do that. So , this really is good reading book. Hello Mr. and Mrs. occupied do you still doubt that will?

Betty Dunham:

Reading a e-book make you to get more knowledge from it. You can take knowledge and information originating from a book. Book is prepared or printed or outlined from each source that filled update of news. In this particular modern era like now, many ways to get information are available for a person. From media social including newspaper, magazines, science guide, encyclopedia, reference book, novel and comic. You can add your understanding by that book. Ready to spend your spare time to spread out your book? Or just in search of the Mathematical Foundations of Quantum Information and Computation and Its Applications to Nano- and Bio-systems (Theoretical and Mathematical Physics) when you essential it?
