Romance: Mina More: Supernatural Love Story Morris Fenris
What happens when your perfectly programmed wife starts craving more? One unsuspecting man is about to find out.

Tim McNamee is a young IT professional from Southwest England who lives in an area known to the central European powers in Brussels as Sector 9G. He made the decision years ago to buy a cyborg bride named Mina and is finally ready to tell the story of why he opted for an electronic lover. Marriage is tough enough for average couples, but the complexities of being wed to an artificially created person presents unique challenges.

Mina is, by all accounts, content with her husband. She owes her existence to Tim, but over time yearns for something different and special. More love, more life, more fun, more friends, more laughter, more thoughts, more things, more “more”. Her restlessness causes her to search for answers to the nature of her being and the pursuit leads to an underground religious group known as the Association of God's Children. However, it also results in Mina exiting her habitation zone without permission from CyberG, the company that built her.

The couple find themselves entrenched in a serious predicament. Mina is caught between Tim, the only love of her short life, and a spiritual search that threatens to reveal more about the nature of her being than she could possibly imagine. Tim thinks of her as an independent person, but his sensibilities are tested when she claims to have supernatural powers. Will Mina’s yearning for something more become their undoing? The authorities are closing in and time is running out for a happily ever after.

*****
Summary of reader reviews of 'Romance: Mina More (Supernatural Love Story)':

"The description of this book captivated my attention and raised my curiosity; it made me want to read this story. In my opinion, cyborg romance is more like a science fiction subcategory which I have rarely encountered.

The baseline of the book is a subject that can easily be rooted into the realistic world - impossible love; What Morris Fenris actually does is to transpose a traditional theme into an original novel. And he manages to deliver a very good intrigue, a fast paced action and some beautifully described sceneries. All of these are in fact the proper ingredients which could turn this cyborg romance book into a best seller.

The super natural love stories seem to become very popular nowadays. However, the idea of living a fantasy love story next to a cyborg wife deserves a 5 star rating itself."

"The author’s description of the relationship between Mina and Tim and their short life together is nothing short of amazing! How could anyone not fall in love with Mina?"

"This is not a science fiction/ fantasy love story that you're going to want to miss."

"If cyborg seduction, supernatural love stories, or science fiction and fantasy best sellers is something that interests you this book will top your favorite list."

"The interwoven concepts of dystopia, love, spirituality, occult, and authority make for a poignant story..."

"If you like sci fi, fantasy, romance or even cyborg romance, then you'll love this book."

"This creative science fiction story is told from Tim's first person POV, first bringing you current and then telling the story about his cyborg wife, Mina. It is unique in that it explores the idea of a cyborg soul in this fantasy love story."

"I am always a sucker for romances and this one had a science fiction twist I had not read before...cyborg romance...a must read."
